

Canby Telephone Association dba DirectLink

Ethernet Transport Service (ETS)

Description: A point to point packet switched based service used to transport information (Internet, Video, and Voice) at high speeds from one destination to another within the State of Oregon – where facilities permit. This service is intended as a wholesale service to other carriers. Equipment at the carrier (customer) premise is not included in the pricing.

Service Elements: There are two monthly recurring rate elements that cover the local loop and transport to the Pittock Block located at 921 SW Washington St., Portland, OR 97205. Additional charges for construction, special equipment, or additional labor may apply. When the ETS is installed, the notice of installation constitutes the customer’s acceptance of the Rules of Regulations set forth in this Tariff and the start of the term.
